

PERMACULTURE responds to the ENERGY CRISIS...with **'EARTH STEWARDSHIP'**

Permaculturist John Champagne in partnership with the Kings Community Theatre and The Crossing Land Education Centre; Welcome you to a screening of the documentary film...

'THE POWER OF COMMUNITY' - how Cuba managed oil depletion

Faced with an oil crisis following the collapse of communism in the Soviet Union and then followed by a trade embargo from the US, Cuba faced up to massive energy challenges in the 1990s. As a nation, they are well on the way

toward a humane approach of dealing with energy descent.

The rest of the world including Australia, now also face their energy descent due to what we now know as Peak Oil. Permaculturists from Australia played

an important role in the early planning and transformation of Cuba, particularly toward urban food security.

A powerful film with a positive message for humanity to embrace

BEGA

Thursday 20th September
